

A WORD-BUILDING,  
DICE-ROLLING,  
BOARD-STROLLING GAME!

# Rollcabulary How to Play

Players: 2 – 6  
Time: about 15 minutes  
Equipment: game board, player score  
sheets, player pieces, pencils,  
two six-sided dice.

## **The GOAL of ROLLCABULARY:**

Move around a game board to build words and be the first to score 30 points.

## **PREPARATION:**

- \*Print one of the five game boards.
- \*Print one player score sheet for each player.
- \*Each player needs one distinct player piece. You can use small toys, flat beads, buttons, dried beans, etc.
- \*Get pencils or other writing utensils.
- \*Get two six-sided dice.

## **GAME PLAY:**

The player with the longest name goes first.

## **CHOOSE YOUR WORD:**

- \*Roll one die. This die represents the category for your first word.

The categories are:

- 1: fruits or vegetables
- 2: animals
- 3: plants
- 4: occupations
- 5: actions
- 6: wild (any of the above)

- \*Choose a word from that category and announce it. If someone announces a word that other players think is invalid (a fake word), the player that chose the word has a chance to find the word in a mutually accepted dictionary. If the word can't be shown, the player must choose another word.

- \*Write that word on the first line of your player score sheet. The sheet shows how many points words of different lengths are worth.

- \*You can make words that are up to 15 letters long.

## **PLAY TO COMPLETE YOUR WORD:**

- \*Once you have chosen your word, place your player's piece on the first letter in that word.
- \*Next, roll the two dice. You can move that many spaces. Movements can be vertical and horizontal but not diagonal. Also, you cannot return to a space within one roll's movements.
- \*If you are able to go to the next letter in your word, move to that letter, then roll again and repeat.
- \*If you can't, chose a space to land on and end your turn.
- \*You may not go over or land on a space that has another player on it.

## **COMPLETING A WORD:**

- \*Once you have visited all of the letters of your word in order, circle the word and add the score for it to your score line. It is the next player's turn.
- \*On your next turn, choose another word as above.

## **WINNING the GAME:**

- \*When someone completes a word and has a total of 30 points they win!
